

» Paymode-X® For Yardi

A custom Yardi Add-on by FitechGelb

Simplify. Integrate.

Paymode-X is a B2B payment network that helps organizations transition from paper checks to electronic payment with rich remittance delivery. Paymode-X can speed payments, reduce labor-intensive processes, and exchange critical transactional information. Using the Yardi add-on module developed by FitechGelb, integration with Paymode-X is simple. The Yardi add-on creates the payment file which is transmitted to Paymode-X for processing. The module supports check and ACH payments for vendors, tenants and owners.

Streamline your payments.

Use Yardi's standard payment processing function to create check records that will be included in the payment file. Exclude check payments from the file that should not be processed by Paymode-X and let the automation do the rest. FitechGelb offers a separate Reconciliation module in conjunction with the Paymode-X integration which allows you to automatically clear payments within Voyager after they have been processed.

Work more efficiently.

Automatically transmit a file from Yardi Voyager for payments to be made through the Paymode-X network. Allow FitechGelb to handle the file integration and do the heavy lifting for you!
